

Acting in pursuance of applicable provisions of the Law on Natural Gas, on an annual basis, AB Amber Grid draws up Ten-year Natural Gas Transmission Network Development Plans. The Plans are developed in consideration of applicable provisions of the National Strategy documents, with a view to the needs of gas market participants, to securing gas supply reliability and efficient operations of the gas transmission system, the Company's environmental policy and applicable legislative provisions.

On 23 August 2018, Ten Year Network Development Plan for 2018–2027 of Lithuanian Natural Gas Transmission System Operator AB Amber Grid was approved by the National Commission for Energy Control and Prices.
