TRANSMISSION SYSTEM OPERATORS OF POLAND AND LITHUANIA ON APRIL 12, 2022, HAS ORGANIZED A WEBINAR ON THE START OF THE COMMERCIAL OPERATION OF SANTAKA IP (POLAND - LITHUANIA)

The gas interconnector between Poland and Lithuania will start commercial operations on 1st May. The initial capacities in both directions will be offered to be booked in April 2022 at the GSA capacity booking platform (GSA Platform).

Therefore, both TSOs introduced market participants to the procedure for booking and participating in the auction procedure at Santaka IP, the functions of the GSA auction platform, as well as information on how to become a shipper, and other important issues concerning the commercial operation of GIPL.

The presentation of the webinar:

- [GIPL introduction](#)
- [Gas market in Poland – general information](#)
- [Gas market in Lithuania – general information](#)
- [How to become shippers in Poland](#)
- [How to become shippers in Lithuania](#)
- [How to register, book the capacity, etc. at the GSA Platform](#)

The GIPL (Gas Interconnection Poland-Lithuania) primarily aims at the establishment of a bi-directional gas transmission pipeline linking the natural gas transmission systems of Poland and Lithuania, allowing for eliminating so-

called energy islands, i.e. regions being so far not integrated with the EU energy market such as Lithuania, Latvia and Estonia, as well as Finland. In addition to SoS function, implementation of GIPL intends to significantly support development of competitive energy market in the Baltic region and contribute to the process of regional gas market integration.

Procurement of the construction works and steel gas pipes for the gas interconnection Poland–Lithuania

AB Amber Grid, in cooperation with the Polish Gas Transmission System Operator GAZ-SYSTEM S.A., is implementing the Project of Common Interest Gas Interconnection Poland-Lithuania (GIPL). The GIPL project aims at the integration of the Baltic States gas markets into a single gas market of the EU, at the diversification of gas supply sources and at the enhancement of the security of gas supplies.

On 15 October 2015, AB Amber Grid and GAZ-SYSTEM S.A. signed a trilateral agreement with the EU Innovation Network Executive Agency (INEA) on the financial assistance of the EU for the construction of the GIPL. In accordance with the contractual terms the project is scheduled for completion by the end of 2019. For more detailed information please refer to the Company's website:

<https://www.ambergrid.lt/en/transmission-system/development-of-the-transmission-system/the-gas-interconnection-Poland-Lithuania>

We would like to inform you that in the 1st quarter of 2016 AB Amber Grid is planning to announce two open public tenders: one for the procurement of construction works and one for the procurement of steel gas pipes for the GIPL in the territory of the Republic of Lithuania. The prospective length of the gas pipeline in the Lithuania is around 170 km. Respective calls for tender will be published online in the Official Journal of the EU at the following link: <http://ted.europa.eu> and in the Central Public Procurement Information System (CPP IS): <https://pirkimai.eviesiejipirkimai.lt>. Information on the tender terms will be published in the Central Public Procurement Information System (CPP IS) at the following link: <https://pirkimai.eviesiejipirkimai.lt> and in the Company's webpage: <https://www.ambergrid.lt/en/about-us/public-procurements/invitations-to-public-tenders>.
