

On 9 October 2017, acting in accordance with the Republic of Lithuania Law on Energy Efficiency Improvement Article 7 (1), the Ministry of Energy of the Republic of Lithuania, UAB EPSO-G, AB Amber Grid and LITGRID AB concluded an Energy Savings Agreement (hereinafter – Agreement). The Agreement stipulates that by 31 December 2020, through the implementation of energy efficiency improvement measures, AB Amber Grid shall save at least 122.5 GWh of energy. The Law provides for the implementation of energy efficiency improvement measures at the Company's end energy consumers' sites.

During 2014 [?]– 2018 the energy savings made 124.2 GWh, or 1.3 per cent exceeded the total amount foreseen in the Agreement. The energy savings were achieved by replacing the natural gas accounting systems with systems complying with the standards of smart accounting.

On 10 July 2019 AB Amber Grid concluded an energy savings transfer agreement with LITGRID AB. More information is available [here](#).
